

*“Occupied Renovations® employs highly experienced, design professionals.”*

Every project needs a design before work can begin. We have full time, licensed Interior Designers on staff to meet the needs of our clients. Our designers are trained in the use of AutoCAD software and are able to develop space plans and finish plan drawings. Additionally, we maintain an extensive design materials library that allows our clients a wide variety of commercial finish selections for their projects, including but not limited to furniture options, lighting, and artwork.

Occupied Renovations® employs highly experienced, design professionals. Our Interior Designers are industry members of IIDA, The International Interior Design Association. IIDA is the leading professional networking and educational association of more than 12,000 members around the world committed to enhancing the quality of life through excellence in interior design and advancing interior design through knowledge.

Our Interior Designers complete rigorous training in their field. Ongoing education allows us to stay abreast of current trends, product developments, regulations and innovations in the interior industry. Our clients can be assured their projects will have the best products that meet their individual requirements. We know the importance of budget in any project, and take pride in knowing your project will be designed to appropriately compliment your budget.
